

FLEX

TYPE:

PROJECT NAME:

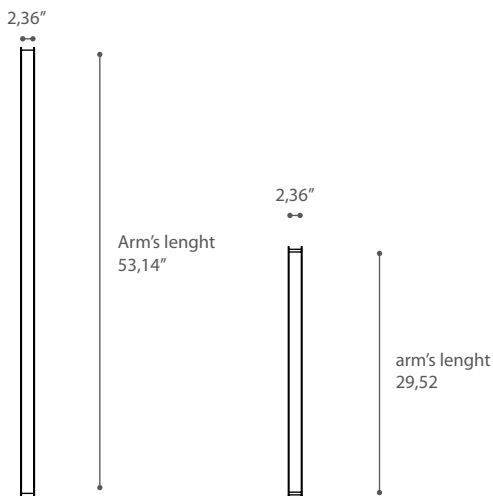

design Claudio Bitetti 2007

Flessibilità e astrazione sono i concetti che hanno portato alla realizzazione del progetto Flex: un sistema di luce dinamico che utilizza due bracci in due dimensioni, collegati tra loro attraverso uno snodo. Ruotabili a 180° i bracci permettono di illuminare spazi e cose secondo le necessità che mutano, anche quotidianamente. Flex è utile e duttile, un disegno essenziale che esalta la funzione della luce.

Struttura: verniciato bianco opaco, nero lucido

Flexibility and abstraction are the concepts that are on the base of Flex project: a dynamic light's system using two arms of two different dimensions joined together by a joint. The arms can be turned to 180° and this permits to light spaces and objects as per the mutable needs of every day. Flex is useful and ductile, an essential drawing that exalts the light's function.

Structure: white matt, black polish painted
